

Israel to upgrade F-15Is with new radar

2015 - 01 - 20 - www.flightglobal.com

The Israeli air force is upgrading the capabilities of its Boeing F-15I strike aircraft, including the installation of a new radar system.

The sensor most likely to be fitted is the Raytheon APG-82(V)1 active electronically scanned array, which was also fitted to the US Air Force's F-15Es in place of the ageing APG-70.

The selection of the US-made radar instead of an Israeli-designed option is likely the result of the fact that Israel can purchase the APG-82(V)1 using the Foreign Military Funding it receives annually from the USA.

"The F-15I is still our strategic jet. It holds the largest number of capabilities and has the ability to carry many weapons and reach far destinations," the head of the F-15I branch told the air force's website. Tasks range from "routine missions related to the combat formation to special missions which will remain confidential", says the official – identified only as Maj A. Israel's comprehensive systems upgrade for the F-15I is a direct outcome of a delay in the delivery of the Lockheed Martin F-35. The nation has ordered 19 conventional take-off and landing F-35As at a cost of \$2.75 billion, with the first two due to arrive in Israel in 2018...

£112M Typhoon support contract extension sustains 650 jobs

2015 - 01 - 20 -

<http://www.baesystems.com>

BAE Systems have been awarded a £112M contract by the UK's Ministry of Defence (MOD) to extend the Typhoon Availability Service (TAS) for the in-service support of the Royal Air Force's (RAF) Typhoon fleet by 15 months. The contract extension means the Company will continue to work alongside the RAF in meeting Typhoon's operational requirements until early 2016.

The extension will help to sustain around 650 jobs for BAE Systems' personnel based at RAF Coningsby and RAF Lossiemouth supporting the Typhoon fleet. Under the contract, BAE Systems is responsible for delivering Typhoon aircrew and ground crew training, maintenance of the aircraft, along with providing technical support and managing spares, repairs and logistics. Nigel Davey, BAE Systems Director for Military Air Support said: "This agreement is a continuation of a strong partnership with the MOD and RAF to support its Typhoon..."

L'Ukraine a rénové 4 avions de combat

2015 - 01 - 07 -

info-aviation.com

L'Ukraine a remis en service quatre avions de combat qui ont récemment subi des travaux de rénovation a annoncé le Bureau du Président de l'Ukraine le 5 janvier. Deux MiG-29 Fulcrum et deux Sukhoi Su-27 Flanker ont été remis à l'armée de l'air ukrainienne lors d'une cérémonie à la base aérienne d'Ozerne avec le président Petro Porochenko.

Outre ces 4 avions de chasse, environ 150 véhicules terrestres et des systèmes d'armes ont été remis à l'armée lors de l'événement. Depuis que les hostilités ont commencé avec la Russie début 2014, l'Ukraine tente de remettre en service sa flotte d'avions de combat dont une grande partie est inapte au vol en raison d'un manque d'investissement dans les forces armées du pays.

Celles-ci inclut des MiG-29, des Su-27, des Su-24 Fencer, des Su-25 Frogfoot, et des avions de transport An-26 Curl. Souffrant de sous-investissements...

Raytheon touts its latest APG-79 AESA radar for F/A-18 aircraft

2015 - 01 - 13 - www.upi.com

Raytheon reports a flight test of its APG-79(V)X AESA radar has validated its enhancement of the capabilities of the U.S. Navy's F/A-18C/D aircraft. Active electronically scanned array radar utilizes small solid-state transmit and receive modules that scatter their signal emissions across a band of frequencies, making their source difficult to detect...
