

## UK Wins Global F-35 Support Assignment Worth GBP500M

2019 - 02 - 13 - [www.asdnews.com](http://www.asdnews.com)

The F-35 avionic and aircraft component repair hub in North Wales was awarded a second major assignment of work worth some £500M by the US Department of Defense. Following the announcement in 2016 that the UK would be the location of the global repair hub for the initial tranche of F-35 components, today's news sees significantly more UK support work to the cutting-edge jets.

This new assignment will support hundreds of additional F-35 jobs in the UK - many of them at the MOD's Defence & Electronics Components Agency at MOD Sealand, where the majority of the work will be carried out.

It will see crucial maintenance, repair, overhaul and upgrade services for an even wider range of F-35 avionic, electronic and electrical systems for hundreds of F-35 aircraft based globally.

The winning solution builds on the innovative joint venture formed between the MOD (DECA), BAE Systems and Northrop Grumman called Sealand Support Services Ltd (SSSL). SSSL support work and services for F-35 are scheduled to commence from 2020. Defence Secretary Gavin Williamson said: "This announcement keeps Britain right at the centre of the global F-35 partnership, the largest defence programme in...

## Faced with depleting fighter squadrons, IAF looks to acquire 21 mothballed MiG-29 jets from Russia

2019 - 02 - 13 - [timesofindia.indiatimes.com](http://timesofindia.indiatimes.com)

Desperate times call for desperate measures. Grappling with a free fall in the number of its fighter squadrons amid the ongoing political dogfight over the Rafale deal, the IAF is now looking to acquire 21 MiG-29 jets lying in an unassembled, mothballed condition with Russia since the later-1980s.

The MiG-29 acquisition plan comes soon after IAF got 35 old airframes and spares of the British-origin Jaguar strike fighters from France, UK and Oman in order to cannibalize them for improving the operational availability of its existing fleet of 115 Jaguars, as was first reported by TOI + . But the 21 MiG-29s, if the deal is inked with Russia, will not be cannibalized.

They will instead be assembled into fully-formed fighters of "MiG-29 upgrade" standards by Russia. IAF has so far upgraded half of its 62 MiG-29 fighters under a Rs 3,842 crore contract inked with Russia in...

## With Modified Fire Control System, China's Su-30 Fighter Jets Might be Aircraft Carrier's Nightmare

2019 - 02 - 01 - [www.defense-aerospace.com](http://www.defense-aerospace.com)

China unveiled a set of photos of the Chinese People's Liberation Army (PLA) Navy's Su-30MKK fighter jets' first training in the new year on January 6, 2019. These photos "inadvertently" revealed a detail: a Su-30 MK2 fighter preparing to take off was mounted with a Chinese PL-12 air-to-air missile.

This does not seem to be anything special, but it indicates that China has already been able to modify the Su-30MKK's fire control system to give it the capability to use China's homegrown weapons. The last thing that aircraft carriers want to see is the Su-30 MK2 fighter jet carrying YJ-12 and YJ-18 anti-ship cruise missiles. Su-30MKK is known as the most powerful fighter jet of the Su-30 family.

It has enhanced the structure on the basis of the former Su-30 fighters. It has two internal heavy-duty hanging points that have been enclosed since the Su-27 fighters, increasing its...

**Le Rafale Marine passe au standard F3**  
2012 - 04 - 26 - info-aviation.com

Les dix premiers Rafale produits au début des années 2000 étaient au standard appelé F1. Ils étaient dotés uniquement de capacité air-air et de ravitaillement en vol.

L'opération de retrofit de ces avions consiste à les modifier en profondeur pour leur donner les mêmes capacités que les avions de standard F3, actuellement produits.

« Le gain opérationnel apporté par le F3 se traduit par un panel de nouvelles missions réalisables par ces avions : attaque air-sol et reconnaissance, mais aussi possibilité d'assurer la mission de dissuasion nucléaire. », explique Christophe Carpentier, responsable technique de l'opération « Retrofit F1-F3 » à la Direction générale de l'armement (DGA). Selon lui, un des challenges du projet est la maîtrise des événements clés, comme l'entrée d'un avion en retrofit ou la sortie d'un fuselage du Service Industriel de l'aéronautique (SIA6).

Cette modernisation consiste aussi à coordonner les travaux des différents intervenants tels que Dassault, MBDA, Thales, Sagem, et d'organismes d'Etat.

Enfin, la maîtrise calendaire est primordiale quand on sait que le montage final des avions retrofités s'intercalera dans la chaîne de production. Chaque phase doit donc...

**South Korea : BAE Challenges Lockheed Martin for F-16 Upgrade Work**  
2012 - 04 - 27 - www.aimonline.com

BAE Systems is competing against Lockheed Martin to be the prime contractor for Korea's forthcoming upgrade of some 130 F-16s. Attention has focused largely on the competition between Northrop Grumman and Raytheon to supply the AESA radar. But the Korean request for proposals also invited non-OEMs to bid as system integrator.

Taiwan and the U.S. are also planning a similar upgrade to some 140 and 300 aircraft, respectively. Other F-16 operators may follow, making this a multibillion-dollar market. BAE claims long experience in supplying avionics and electronics for the F-16. It has provided head-up displays, electronic warfare systems, reconnaissance sensors, flight control computers, terrain avoidance systems, IFF transponders, Link 16 communications and other items. The company designed and has installed a new commercial fire control computer (CFCC) in 270 U.S. Air National Guard F-16C/D...
