

## Leidos Snags Army Aircraft Logistics Contract Potentially Worth \$25.5B

2019 - 03 - 25 - [washingtonexec.com](http://washingtonexec.com)

Leidos has won a contract from the U.S. Army Contracting Command-Redstone with a total potential value of \$25.5 billion to provide aircraft logistics and maintenance support for worldwide operations, primarily in Afghanistan and Greece.

This is part of the Worldwide Logistics Support Services – Contractor Logistics Support deal, and is a multiple award, indefinite delivery/indefinite quantity firm-fixed-price contract with a 5-year base period of performance and one 5-year option ordering period. Under the contract, Leidos will provide services to support rotary-wing and fixed-wing

aircrafts around the world for the Army's Multi-National Aviation Special Project Office. This includes sustainment engineering, supply support, maintenance management, furnishing support equipment, aircraft modifications, manpower, facilities and infrastructure, and packaging, handling, storage and transportation, according to the company.

Leidos has a history of supporting military missions worldwide, said Senior Vice President Kevin Lansdowne of Leidos Airborne Solutions. "We look forward to providing superior services that help the Army rapidly respond to the evolving needs of warfighters," he said. Earlier...

## Reduced Availability of Swiss F/A-18 Fleet

2019 - 04 - 02 - [www.defense-aerospace.com](http://www.defense-aerospace.com)

The implementation of measures to extend the life of the fighter jets is delayed due to technical problems. This currently reduces the availability of aircraft in the F / A-18 fleet of the Swiss Air Force. However, security of the airspace is guaranteed at all times.

The head of VBS has informed the security commissions of the parliament. Following the "no" vote of the voters on the purchase of the Gripen fighter jet in 2014, Parliament approved a service life extension of the F / A-18 fleet from 5,000 to 6,000 flight hours for each aircraft. This is to close the emerging capability gap in the air by 2030.

Part of this program is the rehabilitation of the structure of the approximately 20-year-old aircraft. RUAG was able to upgrade a first aircraft as a prototype in the summer of 2018 within four months. For the next five aircraft, however, this work will take much longer than expected....

## Malaysia : Banking on Russian connection

2019 - 04 - 10 - [www.nst.com.my](http://www.nst.com.my)

Malaysian is banking on its Russian connection to boost the sale of its main commodity – palm oil! The New Straits Times (NST) reliably learnt that Malaysia was especially keen to engage in billion-dollar trade-offs on defence and security procurement, including military aircraft, armaments and software.

This, the NST was made to understand, was to check the declining global demand and price for Malaysian palm oil, which was affecting national coffers and causing a trade imbalance. In an attempt to spur palm oil sales, Defence Minister Mohamad Sabu is scheduled for a crucial, high-profile visit to Moscow on April 20. Mohamad is believed to hold face-to-face talks with his Russian counterpart Sergei Shoigu and president Vladimir Putin.

Confirming his forthcoming visit to the Kremlin, Mohamad said that Malaysian...

### Le Rafale Marine passe au standard F3

2012 - 04 - 26 - info-aviation.com

Les dix premiers Rafale produits au début des années 2000 étaient au standard appelé F1. Ils étaient dotés uniquement de capacité air-air et de ravitaillement en vol.

L'opération de retrofit de ces avions consiste à les modifier en profondeur pour leur donner les mêmes capacités que les avions de standard F3, actuellement produits.

« Le gain opérationnel apporté par le F3 se traduit par un panel de nouvelles missions réalisables par ces avions : attaque air-sol et reconnaissance, mais aussi possibilité d'assurer la mission de dissuasion nucléaire. », explique Christophe Carpentier, responsable technique de l'opération « Retrofit F1-F3 » à la Direction générale de l'armement (DGA). Selon lui, un des challenges du projet est la maîtrise des événements clés, comme l'entrée d'un avion en retrofit ou la sortie d'un fuselage du Service Industriel de l'aéronautique (SIA6).

Cette modernisation consiste aussi à coordonner les travaux des différents intervenants tels que Dassault, MBDA, Thales, Sagem, et d'organismes d'Etat. Enfin, la maîtrise calendaire est primordiale quand on sait que le montage final des avions retrofités s'intercalera dans la chaîne de production. Chaque phase doit donc...
- ACTUALITES**: A news section with the headline:
 

### South Korea : BAE Challenges Lockheed Martin for F-16 Upgrade Work

2012 - 04 - 27 - www.aimonline.com

BAE Systems is competing against Lockheed Martin to be the prime contractor for Korea's forthcoming upgrade of some 130 F-16s. Attention has focused largely on the competition between Northrop Grumman and Raytheon to supply the AESA radar. But the Korean request for proposals also invited non-OEMs to bid as system integrator.

Taiwan and the U.S. are also planning a similar upgrade to some 140 and 300 aircraft, respectively. Other F-16 operators may follow, making this a multibillion-dollar market. BAE claims long experience in supplying avionics and electronics for the F-16. It has provided head-up displays, electronic warfare systems, reconnaissance sensors, flight control computers, terrain avoidance systems, IFF transponders, Link 16 communications and other items. The company designed and has installed a new commercial fire control computer (CFCC) in 270 U.S. Air National Guard F-16C/D...
