

AAR Delivers First P-8A Poseidon to U.S. Navy fleet

2019 - 05 - 22 - gbp.com.sg

AAR has completed its first planned overhaul, age exploration and planned inspection of its first U.S. Navy P-8A Poseidon (P-8A) aircraft. As part of a seven-year, indefinite-delivery/indefinite-quantity (IDIQ) contract signed last year with the Navy, AAR is providing heavy depot airframe maintenance, as well as year-round field support, for the U.S. fleet.

The P-8A aircraft arrived at AAR for its first Age Exploration Plan Depot (AEPD) visit, which is part of a systematic, scheduled maintenance requirement. "Delivering a mission-ready aircraft means executing a successful

maintenance-repair plan. Many thanks to the AAR team for a job well done," said Capt. Tony Rossi, Program Manager for the NAVAIR's Maritime Patrol and Reconnaissance Program (PMA-290). "As expected, there have been no significant aircraft condition findings.

The aircraft continues to fly anti-submarine and anti-surface warfare missions, humanitarian and search and rescue missions around the world, and it's performing well." "Our team is honored to perform maintenance on the P-8A Poseidon for the U.S. Navy and ensure its operational-readiness for the warfighter," said William Patton, AAR...

RAF Typhoons trial Leonardo's BriteCloud

2019 - 05 - 28 -

www.adsadvance.co.uk

Speaking at the Typhoon Ministerial Meeting in Germany, Defence Minister Stuart Andrew announced the beginning of a series of capability tests of BriteCloud, a drinks-can sized missile decoy to protect combat jets from the latest radar-guided missiles. BriteCloud uses powerful radar emissions to disrupt the targeting system within air-to-air and surface-to-air missiles, drawing them away to a safe distance.

The device can be fired from an aircraft flare dispenser without the need for modification to the aircraft. Designed and manufactured in Luton by Leonardo, the miniature decoy has been tested and released for the first time aboard the RAF's fleet of Typhoon aircraft. The MoD has been working with Leonardo on the development of BriteCloud since 2012 and has so far invested £27 million in the system, with the project sustaining 50 jobs in Luton...

La DGA retient Thales et Sopra Steria pour accélérer le développement de la plateforme Big Data des forces armées

2019 - 05 - 23 -

www.thalesgroup.com

La numérisation croissante de l'engagement des forces françaises implique une transformation numérique, multiplicateur d'effet au service de l'action concrète sur le terrain. Cette numérisation concerne les services de soutien et de maintenance logistique, comme les agents de renseignement, l'analyse prédictive, le déploiement des systèmes d'information et de communication, la cybersécurité ou encore l'entraînement et la simulation.

Acteur reconnu du Big Data, le consortium Thales Sopra Steria a l'ambition d'accompagner le développement maîtrisé de cette révolution digitale du ministère des Armées, objectif affirmé par la Loi de Programmation Militaire 2019-2025...
