

## Serbia outlines Orao modernisation programme

2019 - 07 - 03 - [www.flightglobal.com](http://www.flightglobal.com)

Serbia's defence ministry has detailed a major upgrade programme being performed on its Soko J-22 Orao combat aircraft and NJ-22 trainers, which will significantly enhance the type's operational capabilities.

Speaking at the Partner 2019 exhibition in Belgrade in late June, Nenad Miloradovic, the defence ministry's assistant for defence technologies, confirmed that the modernisation activity – unofficially dubbed Orao 2.0 – will be conducted in two phases. Work to be completed by the end of this year includes incorporating new navigation and targeting systems in the rear cockpit of the two-seat NJ-22.

Miloradovic says Belgrade has purchased Safran's Sigma 95 inertial navigation system, which sources indicate will be integrated with a mission computer and multifunctional displays developed by local manufacturer Teleoptik-Ziroskopi.

The first phase of work will also integrate new weapons. This process will enable the NJ-22 to be flown with a weapons system officer in the rear cockpit, so that the type can serve as a dedicated ground-attack asset. Miloradovic says the second phase of modernisation work will include "complete digitalisation" of the aircraft's cockpit, without revealing...

## Canada : Upgrades for the CF-18 to Be Operational Until 2032

2019 - 06 - 26 - [www.defense-aerospace.com](http://www.defense-aerospace.com)

In the report released in fall 2018, the Auditor General found that, other than some weapons upgrades in 2011, National Defence had not significantly upgraded the CF-18 for combat since 2008. The Auditor General concluded that the CF-18's capabilities are not up to date with most modern combat aircraft and air defence systems and that the problem would get worse with time.

As such, the Auditor General requested that National Defence analyze the upgrades required for CF-18 fighter aircraft to be operationally relevant until 2032 and to seek approval for those which were achievable. The Department of National Defence agreed to the Auditor General's recommendation. The Department's response highlighted plans to seek approval on regulatory and interoperability upgrades to continue flying the CF-18 until 2032. In addition, the Department stated that the Royal Canadian Air Force is conducting...

## L3Harris Technologies to Develop USAF Replacement Radio for AN/ARC-190

2019 - 07 - 05 - [gbp.com.sg](http://gbp.com.sg)

The U.S. Air Force has awarded a development prototype contract to L3Harris Technologies for the L3Harris Falcon Wideband Airborne HF Radio, after the company was selected by the U.S. Air Force in a competitive prototype effort. L3Harris Technologies will now be part of a competitive down select.

The initial development phase will lead to low-rate initial production followed by a full production decision to replace the service's AN/ARC-190 airborne HF radio. "The capabilities provided by the L3Harris Falcon Wideband Airborne HF Radio will be a game-changer for the U.S. Air Force, with L3Harris' modernized software-defined technology that is designed to overmatch in contested and SATCOM-denied environments," said Ryan McCarty, Vice President and General Manager, DoD Tactical Communications, L3Harris Communication Systems. "This prototype development selection expands our airborne product..."
