

## Ukraine Launches Su-24 and Il-76 MRO Program

2019 - 08 - 08 - [www.ainonline.com](http://www.ainonline.com)

The Ukrainian State Enterprise Mykolaiv (Nikolaev in Russian) Aviation Repair Plant (NARP), which is a part of the UkrOboronProm (UOP) military-industrial concern, announced on August 5 a new modernization and MRO program involving Ukrainian Air Force Su-24M and Su-24MR bomber/reconnaissance aircraft, as well as Il-76MD military transports. The core of the new program is to supply the UAF with additional Su-24M supersonic bombers and Su-24MR reconnaissance aircraft.

The Su-24MR has a Shtik side-looking airborne radar (SLAR) and the Zima infrared reconnaissance system to detect

camouflaged objects, as well as high-resolution cameras and radar-location systems. Its high speed enables it to conduct reconnaissance missions deep (215 nm/400 km) into an adversary's territory, the UOP announcement highlighted.

A common feature with the Su-24M is the terrain-following radar that enables both aircraft to fly extremely low at high speed to avoid enemy fire. NARP is currently working to modernize Ukraine's Il-76MD military transport, which is slated to receive advanced avionics and navigation equipment to comply with ICAO requirements...

## Russia upgrades Su-25 assault jets

2019 - 08 - 21 -  
airrecognition.com

The overhaul and upgrade of Su-25 assault jets accomplished by the enterprises of the United Aircraft Corporation (UAC) extend their life cycle and provide new modern combat capabilities. The combat effectiveness of an upgraded Su-25SM3 increased three times, the UAC said.

ARZ 121 has a rich experience in cooperation with foreign customers. The enterprise has overhauled and upgraded over 200 aircraft and over a hundred engines for 27 countries. The Vzlet magazine said that besides Russian Su-25, it also overhauled the jets of Kazakhstan and Uzbekistan. The technological and production capacities of the plant are expanded in the course of reconstruction and re-equipment.

In particular, the dependence of the enterprise on the delivery of first category units has decreased. The cost of a unit has considerably trimmed and the production cycle accelerated. There is a quick response to a sharp...

## Indian Air Force Freezes Jaguar Engine Upgrade

2019 - 08 - 22 - www.defense-aerospace.com

The Indian Air Force will likely put a freeze on its plans to upgrade the engines on its four-decade-old SEPECAT Jaguar deep penetration strike fighter fleet and shift its efforts toward acquiring additional Sukhoi Su-30MKIs as a replacement.

The engine upgrade forms part of a larger effort aimed at keeping the Jaguar fleet serviceable and effective for an additional 20 years. That effort – the DARIN upgrade program – involves a comprehensive avionics upgrade and installation of an improved cockpit system.

Under a contract inked in December 2009, a total of 61 of the 123-aircraft Jaguar fleet are undergoing an upgrade from DARIN I to DARIN III avionics standard, but the project nonetheless remains well behind schedule (seven years behind, per reports). The DARIN upgrade program includes installation of the Display Attack Ranging Inertial Navigation (DARIN) III avionics suite, new AESA radar...
