

India to upgrade Su-30MKI fighters and Mi-17 helicopters

2019 - 10 - 09 - airrecognition.com

The Indian Air Force (IAF) is planning to upgrade its Sukhoi Su-30MKI 'Flanker- H' multirole combat aircraft and Mil Mi-17-family 'Hip' utility helicopters, the military service's Air Chief Marshal Rakesh Kumar Singh Bhadauria told Indian media on October 4.

According to Bhadauria, India has a plan to update Su-30MKIs and Mikoyan-Gurevich MiG-29 'Fulcrum' fighter jets and the Hip helicopters. "The MiG-29 upgrade program is progressing. The Su-30MKI aircraft are also planned to be upgraded, further enhancing their operational capability," said the IAF chief, adding that the military service's

Mi-17V-5 helicopters had already entered their modernization. "The Mi-17-1V 'Hip' and Mi-17 chopper fleet is being upgraded with 'glass cockpits', avionics, and electronic warfare suite," said the TV channel NDTV, quoting Bhadauria.

According to the marshal, India had also initiated mid-life modernization of several foreign platforms, including the Mirage 2000 fighter jet and the Jaguar fighter-bombers. The head of the IAF also covered the development of Indian air defence. "Our air defence network has also been strengthened by the induction and integration of modern sensors and weapon systems....

Philippine air force reactivates seven old Huey helos thanks to spares from Japan

2019 - 10 - 12 -

www.defensenews.com

The Philippines is set to return more U.S.-built utility helicopters to its stretched helicopter fleet thanks to spare parts from Japan, even as the country continues to buy newer transport helicopters and is reportedly seeking more. According to the government's official newswire, Philippine Air Force (PAF) spokesman Maj. Aristides Galang said in a statement that seven Bell UH-1 "Huey" helicopters would be brought back to flying status using the spares donated by the Japanese government in March this year.

Galang was quoted by the Philippine News Agency as also saying that an inspection team from the PAF's 205th Tactical Helicopter Wing visited the storage unit holding the spares earlier this month and found several items needed for restoring seven of the helicopters in operational status. The inspected spare parts were main rotor blades, tail rotor blades, and tail rotor driveshafts,...

Russian Helicopters to merge Mil and Kamov design bureaus

2019 - 10 - 11 -

www.flightglobal.com

Russian Helicopters plans to merge its two storied design bureaus, Mil and Kamov, into one unit, called the National Helicopter Center. The board of directors of Russian Helicopters, which is part of the larger Russian government-owned Rostec State Corporation, decided the two bureaus would be more efficient as one, the company says in a media release on 11 October. In particular, the board says the creation of the National Helicopter Center will help get rid of administrative, legal and economic barriers in the way of cooperation between the two design teams.

Freed resources will be reinvested in aircraft research and development, the company says. The firm did not say where the new National Helicopter Center would be headquartered. Despite the consolidation, Mil and Kamov would be preserved as "freestanding" brands, it says. Russian Helicopters was formed in 2007 through the merger...
