

## Berlin targets Eurofighter AESA deal and top-up buy

2019 - 11 - 07 - [www.flightglobal.com](http://www.flightglobal.com)

Germany appears poised to advance a joint programme with Spain to equip the nations' later-model Eurofighters with active electronically scanned array (AESA) radars, as Berlin also nears approving the acquisition of 38 new aircraft to replace its Tranche 1-standard interceptors.

"The [AESA] contract is ready – we are in negotiation with NETMA [the NATO Eurofighter and Tornado Management Agency] and the German customer to make sure that this contract can be implemented as soon as possible," says Kurt Rossner, Airbus Defence & Space's head of combat aircraft systems. A deal should be finalized late this year or in

early 2020, he says, with deliveries for both nations to commence in 2022. To be supplied by the Leonardo-led Euro radar consortium, the new "E-Scan Mk1" radar sets will be retrofitted to 110 Tranche 2 and 3 jets for Germany, while Spain plans to acquire an initial batch of 19 units.

Rossner notes that export buyers Kuwait and Qatar will receive Eurofighter Typhoons with "Mk1A" radars, with the German and Spanish configuration differing through the use of new multi-channel receiver technology. He indicates that the UK plans to field a future "Mk2" sensor optimised for electronic...

## Japan approved for \$4.5B upgrade package for its F-15Js

2019 - 10 - 30 - [www.upi.com](http://www.upi.com)

The U.S. State Department approved a request by Japan for a \$4.5 billion upgrade of its F-15J Eagle fleet of fighter planes. Up to 98 planes, of about 200 owned by the Japan Air Defense Forces, would be brought up to a benchmark known as Japanese Super Interceptor under the plan, the Defense Security Cooperation Agency announced on Tuesday.

The planes would receive the Active Electronically Scanned Array Radar, Advanced Display Core Processor II Mission System Computers, and ALQ-239 Digital Electronic Warfare System suites, in addition to training, support and testing equipment and other logistical elements.

The State Department action still requires the approval of the U.S. Congress and does not guarantee that Japan will purchase the entire package. The country's Air Defense Force has sought to upgrade the aircraft for the past two years, with Tuesday's DSCA announcement covering most...

## Australia : Sustaining the Chinook

2019 - 11 - 09 -

[www.australiandefence.com.au](http://www.australiandefence.com.au)

Army's 10 Boeing CH-47F Chinook helicopters not only provide a vital medium lift capability for land manoeuvre operations, but are an integral component of the ADF's ability to project force across the beach.

The Chinook is now a crucial member, together with the MRH-90 Taipan battlefield mobility helicopter and Tiger Armed Reconnaissance Helicopter, of an amphibious Air Combat Element (ACE), operating from the decks of Navy's amphibious warfare vessels. Supporting the capability as the current CH-47 Integrated Support Services Contract (CISSC) provider is Boeing Defence Australia, which provides training, engineering and maintenance support to Army Aviation (AAvn) in Townsville, with the 5th Aviation Regiment, and at the Army Aviation Training Centre (AAvnTC) at Oakey.

Chinooks for Army Army's involvement with the venerable Chinook helicopter stretches back to August 1990, shortly after...

**Le Rafale Marine passe au standard F3**  
2012 - 04 - 26 - [info-aviation.com](http://info-aviation.com)

Les dix premiers Rafale produits au début des années 2000 étaient au standard appelé F1. Ils étaient dotés uniquement de capacité air-air et de ravitaillement en vol.

L'opération de retrofit de ces avions consiste à les modifier en profondeur pour leur donner les mêmes capacités que les avions de standard F3, actuellement produits.

« Le gain opérationnel apporté par le F3 se traduit par un panel de nouvelles missions réalisables par ces avions : attaque air-sol et reconnaissance, mais aussi possibilité d'assurer la mission de dissuasion nucléaire. », explique Christophe Carpentier, responsable technique de l'opération « Retrofit F1-F3 » à la Direction générale de l'armement (DGA). Selon lui, un des challenges du projet est la maîtrise des événements clés, comme l'entrée d'un avion en retrofit ou la sortie d'un basculement du Service Industriel de l'aéronautique (SIAA).

Cette modernisation consiste aussi à coordonner les travaux des différents intervenants tels que Dassault, MBDA, Thales, Sagem, et d'organismes d'Etat. Enfin, la maîtrise calendaire est primordiale quand on sait que le montage final des avions rétrofités s'intercalera dans la chaîne de production. Chaque phase doit donc...

**ACTUALITES**

**South Korea : BAE Challenges Lockheed Martin for F-16 Upgrade Work**  
2012 - 04 - 27 - [www.aimonline.com](http://www.aimonline.com)

BAE Systems is competing against Lockheed Martin to be the prime contractor for Korea's forthcoming upgrade of some 130 F-16s. Attention has focused largely on the competition between Northrop Grumman and Raytheon to supply the AESA radar. But the Korean request for proposals also invited non-OEMs to bid as system integrator.

Taiwan and the U.S. are also planning a similar upgrade to some 140 and 300 aircraft, respectively. Other F-16 operators may follow, making this a multibillion-dollar market. BAE claims long experience in supplying avionics and electronics for the F-16. It has provided head-up displays, electronic warfare systems, reconnaissance sensors, flight control computers, terrain avoidance systems, IFF transponders, Link 16 communications and other items. The company designed and has installed a new commercial fire control computer (CFCC) in 270 U.S. Air National Guard F-16C/D...
