

UAE Signs Up for Mirage Upgrade

2019 - 11 - 18 - www.ainonline.com

The UAE announced on November 18 at the Dubai Airshow a contract to upgrade some of its Dassault Mirage 2000-9s in a deal with Dassault Aviation that is valued at around AED1.8 billion (\$490 million).

The announcement of the agreement was widely anticipated, a program to upgrade the UAE Air Force's fleet having first been aired during the 2017 Dubai show. During that event, a deal to upgrade the UAE Air Force's F-16s was also announced. No details regarding the nature of the Mirage upgrade were revealed, but it was earlier reported that the upgrade might include the Talios advanced targeting pod and the RDY-3

radar, both from French company Thales. In the same defense ministry announcement as the Mirage upgrade, Thales was also awarded an AED232 million contract for "maintenance and spares" for the Mirage 2000, while an AED93 million contract was also announced with the Mirage's main weapon supplier, MBDA France.

The Mirage is typically armed in UAEAF service with MBDA's Black Shaheen variant of the Storm Shadow/Scalp long-range stand-off precision attack missile, along with Mica air-to-air missiles. Another Mirage weapon is the Al Tariq precision-guided bomb that is produced...

NATO to upgrade its AWACS surveillance aircraft for \$1 billion

2019 - 11 - 21 -

www.defensenews.com

NATO officials plan to spend \$1 billion on upgrades to the alliance's fleet of AWACS reconnaissance planes, according to Secretary General Jens Stoltenberg. "I can confirm we will sign a contract upgrading, modernizing the AWACS fleet — \$1 billion," Stoltenberg was quoted as telling reporters ahead of a meeting of NATO foreign ministers in Brussels on Wednesday.

The news comes coupled with an announcement that the first of five Global Hawk drones making up the Alliance Ground Surveillance program was en route from the United States to its future home base at Sigonella, Sicily. "This reflects how NATO is investing in high-tech capabilities," NATO spokeswoman Oana Lungescu wrote on Twitter. The Boeing-made AWACS planes, introduced in 1982, are slated to remain in service until 2035. Their job is to detect enemy missiles and aircraft threatening NATO airspace. Alliance pilots have flown...

MiG-29 Fulcrums Return to the Polish Skies

2019 - 11 - 26 -

www.defence24.com

The General Commander of the Polish Armed Forces made a decision to resume the MiG-29 operations in the Polish Air Force, announced General Jacek Pszczola and commander of the 1st Tactical Aviation Wing, Col. Maciej Trelka. A press briefing was organized today at the 23rd Tactical Airbase in Minsk Mazowiecki, concerning the future of the Polish MiG-29 jets.

The meeting involved, among other persons, the head of the MoD, Mariusz Blaszczak and General Commander of the Armed Forces, General Jaroslaw Mika. This involved a dialogue with the Polish pilots and ground crews, with regards to the technical status in which the jets find themselves. During the press briefing in Warsaw Div. General Jacek Pszczola announced that the MiG-29 jets would get airborne soon and that the pilots want to fly them. This may be interpreted as MoD's and Command's support for the stance adopted by the crews and personnel...

Le Rafale Marine passe au standard F3

2012 - 04 - 26 - info-aviation.com

Les dix premiers Rafale produits au début des années 2000 étaient au standard appelé F1. Ils étaient dotés uniquement de capacité air-air et de ravitaillement en vol.

L'opération de retrofit de ces avions consiste à les modifier en profondeur pour leur donner les mêmes capacités que les avions de standard F3, actuellement produits.

« Le gain opérationnel apporté par le F3 se traduit par un panel de nouvelles missions réalisables par ces avions : attaque air-sol et reconnaissance, mais aussi possibilité d'assurer la mission de dissuasion nucléaire. », explique Christophe Carpentier, responsable technique de l'opération « Retrofit F1-F3 » à la Direction générale de l'armement (DGA). Selon lui, un des challenges du projet est la maîtrise des événements clés, comme l'entrée d'un avion en retrofit ou la sortie d'un fuselage du Service Industriel de l'aéronautique (SIA6).

Cette modernisation consiste aussi à coordonner les travaux des différents intervenants tels que Dassault, MBDA, Thales, Sagem, et d'organismes d'Etat. Enfin, la maîtrise calendaire est primordiale quand on sait que le montage final des avions retrofités s'intercalera dans la chaîne de production. Chaque phase doit donc...

- ACTUALITES**: A document dated 2012-04-27 with the headline:

South Korea : BAE Challenges Lockheed Martin for F-16 Upgrade Work

2012 - 04 - 27 - www.ainonline.com

BAE Systems is competing against Lockheed Martin to be the prime contractor for Korea's forthcoming upgrade of some 130 F-16s. Attention has focused largely on the competition between Northrop Grumman and Raytheon to supply the AESA radar. But the Korean request for proposals also invited non-OEMs to bid as system integrator.

Taiwan and the U.S. are also planning a similar upgrade to some 140 and 300 aircraft, respectively. Other F-16 operators may follow, making this a multibillion-dollar market. BAE claims long experience in supplying avionics and electronics for the F-16. It has provided head-up displays, electronic warfare systems, reconnaissance sensors, flight control computers, terrain avoidance systems, IFF transponders, Link 16 communications and other items. The company designed and has installed a new commercial fire control computer (CFCC) in 270 U.S. Air National Guard F-16C/D...
