

## IAF's Il-78MKI Aerial Tankers to get new Engines and Avionics and additional AWACS

2020 - 03 - 26 - idrw.org

As per acquisition planned by the airforce for the year 2020-21, IAF plans to upgrade avionics of the Six Il-78MKI aerial refueling tanker based on the Il-76 strategic air-lifter and also re-engine them with the modern Aviadvigatel PS-90A-76 engine thus replacing the original Aviadvigatel D-30KP2 engines currently powering them.

IAF also plans to procure Two more Israeli ELW-2090 airborne early warning and control (AEW&C) radar system mounted on the Il-76 A-50 heavy air-lifter to supplement its current fleet of 3 AEW&C Radar of the same system But it is not confirmed if it will be based on

Surplus stock of air-frame to be sourced from Ukraine as originally planned, or will be based on Il-76MD-90A which is Russian version currently produced at the new production line located in Aviastar's facility in Ulyanovsk, Russia.

IAF also operates 17 Il-76MDs Transport Aircraft which were procured in the early '80s and have been showing signs of aging and will likely get new modern avionics soon, but it is not clear if they will be getting new PS-90A-76 engines. 3 Il-76 A-50 AEW&C will only get upgraded avionics since they are already powered by the Aviadvigatel PS-90A-76 engines Russian Ilyushins...

## Germany invests in Luftwaffe

2020 - 03 - 09 - [www.janes.com](http://www.janes.com)

The budget committee of the Bundestag, the German parliament, approved another EUR500 million (USD565.5 million) on 4 March to improve the capabilities of the Bundeswehr, the Ministry of Defence (MoD) announced on its website on 6 March. Over EUR300 million of this amount has been earmarked for the Luftwaffe. Around EUR240 million was approved for the digitalisation of the head-up displays (HUDs) of Luftwaffe Tornados.

The computer being developed to control the displays will also replace the aircraft's main computer. This is necessary to avoid obsolescence so Tornado capabilities continue to be available until the aircraft is replaced starting in 2030, according to the MoD, which recalled that it is the only Luftwaffe aerial platform used for NATO nuclear burdensharing, suppression of enemy air defences, and in the naval strike role.

The Bundestag budget committee approved more than EUR36...

## Nigerian Air Force refurbishes another Alpha Jet

2020 - 03 - 24 -

[www.defencenweb.co.za](http://www.defencenweb.co.za)

The Nigerian Air Force (NAF) has returned another Alpha Jet to service after maintenance and an avionics upgrade. The NAF said the reactivated Alpha Jet (NAF 455) was commissioned on 21 March at the 407 Air Combat Training Group (407 ACTG) in Kainji.

Speaking during the ceremony, the Chief of the Air Staff (CAS), Air Marshal Sadique Abubakar, said he was satisfied with the Periodic Depot Maintenance (PDM) that was carried out and added that the aircraft's return to service would go a long way in boosting the morale of troops on the frontlines and better equip the NAF in its drive to sustain the offensive initiative against terrorists and insurgents. Abubakar said the in-house PDM, apart from being cost-effective when compared to the overseas option, also affords NAF technicians the opportunity to build better technical capacity...

## Chinese military aircraft to receive new stealth coatings

2020 - 03 - 16 - www.globaltimes.cn

The Chinese People's Liberation Army (PLA) Air Force recently issued a new regulation ordering future aircraft to be painted with low observable coatings and standardized markings, a move aimed at giving Chinese warplanes a combat advantage as they will less likely be detected by both the naked eye and military radar. The regulation mandates all new warplanes should have low observable coatings and...
