BLOCKCHAIN DATABASE FOR ADDITIVE MANUFACTURING

2020-04-16 - worldwide.espacenet.com

A blockchain database representing an additive manufacturing process includes a plurality of data blocks, wherein integrity of the blockchain is ensured by cryptographic encoding of consecutive blocks of the blockchain, and wherein each block of the blockchain holds data about an additive manufacturing process of a component which is to be manufactured via an additive manufacturing device, wherein data of each layer for the component is linked in a separate block of the blockchain.

L'ordinateur quantique met-il déjà en danger la sécurité des données ?

2020-04-01 - www.journaldunet.com

L'ordinateur quantique fait la promesse de la rapidité et de la performance. Les services informatiques doivent donc l'intégrer dans leur stratégie de cybersécurité dès aujourd'hui, car l'ordinateur quantique sera non seulement idéal pour des simulations et autres calculs, mais aussi pour les cyberattaques.
