

The A-10 Warthog Is Preparing For Its Biggest Upgrade In Over A Decade

2020 - 10 - 23 - www.thedrive.com

Just six years ago the U.S. Air Force was on the verge of culling its entire fleet of A-10 Thunderbolt IIs, better known as Warthogs. In 2014, the then USAF Chief of Staff, Gen Mark Welsh III, said the Air Force had to retire the A-10 completely if it was to make substantial cuts to its budgets, and that it required freed-up funding and manpower to be channeled into the standup of new F-35 units.

Welsh claimed divesting the close air support stalwart would save \$3.7 billion across the five-year future-year defense program and another \$500 million in cost avoidance for upgrades that wouldn't be

necessary. How times have changed. Fast forward to 2020 and the A-10 is not only here to stay, but it's getting a raft of upgrades to keep it relevant for years to come.

New weapons, a new cockpit layout, and an overhaul of tactics are some of the elements now in the pipeline to keep the "Hawg's" tusks sharp and its community a meaningful contributor on the front line fight. Built to ravage Soviet tanks on the plains of northern Europe, the A-10 was designed around the General Electric GAU-8/A Avenger 30mm cannon and its seven barrels, which are able to dish out devastating punishment to armor....

MCO : les résultats de la réforme

2020 - 10 - 21 - air-cosmos.com

En visite à l'Atelier industriel de l'aéronautique (AIA) de Clermont-Ferrand, la Ministre des Armées a fait un point d'étape sur la réforme du MCO. Direction de la maintenance aéronautique. Véritable chantier encouragé par la Ministre des Armées, le MCO a connu plusieurs réformes sur les trois dernières années. Entre la création de la DMAé et la mise en place de contrats verticalisés, l'ambition est ainsi de responsabiliser l'industrie et d'obtenir de meilleurs taux de disponibilité.

Alors qu'en 2017, ce taux était en dessous des 50%, la gestion des parcs et l'engagement opérationnel venaient impacter les moyens disponibles pour la formation et l'entraînement des forces. La Ministre des Armées a profité de sa visite de l'AIA à Clermont-Ferrand, le 15 octobre dernier, pour dresser un premier bilan. Si les chiffres sont encourageants, ils reflètent néanmoins le temps long dans lequel s'inscrit...

The Italian Air Force takes delivery of its most advanced Eurofighter Typhoon

2020 - 10 - 23 -

www.leonardocompany.com

Taking off from Leonardo's plant in Caselle (Turin), the final and most advanced Eurofighter Typhoon of the Italian Air Force was handed over during a ceremony today becoming one of the defence aircraft assigned daily to the protection of the Italian skies. The ceremony was attended by the Chief of Staff of the Italian Air Force, Gen. Alberto Rosso, the CEO of Leonardo, Alessandro Profumo and the Aircraft Division Managing Director, Marco Zoff. "The collaboration path we are celebrating today, embodied by an aircraft with extraordinary capabilities, is the result of a long-term supranational strategic, political, and industrial vision, which has allowed Europe to have its own security asset, and benefit from a programme that has been able to represent a technological accelerator and a unique engine of development in the history of..."

Le Rafale Marine passe au standard F3
2012 - 04 - 26 - info-aviation.com

Les dix premiers Rafale produits au début des années 2000 étaient au standard appelé F1. Ils étaient dotés uniquement de capacité air-air et de ravitaillement en vol.

L'opération de retrofit de ces avions consiste à les modifier en profondeur pour leur donner les mêmes capacités que les avions de standard F3, actuellement produits.

« Le gain opérationnel apporté par le F3 se traduit par un panel de nouvelles missions réalisables par ces avions : attaque air-sol et reconnaissance, mais aussi possibilité d'assurer la mission de dissuasion nucléaire », explique Christophe Carpentier, responsable technique de l'opération « Retrofit F1.F3 » à la Direction générale de l'armement (DGA). Selon lui, un des challenges du projet est la maîtrise des événements clés, comme l'entrée d'un avion en retrofit ou la sortie d'un fuselage du Service Industriel de l'aéronautique (SIA4).

Cette modernisation consiste aussi à coordonner les travaux des différents intervenants tels que Dassault, MBDA, Thales, Saïem, et d'organismes d'Etat. Enfin, la maîtrise calendaire est primordiale quand on sait que le montage final des avions rétrofités s'intercalera dans la chaîne de production. Chaque phase doit donc...

ACTUALITES

South Korea : BAE Challenges Lockheed Martin for F-16 Upgrade Work
2012 - 04 - 27 - www.ainonline.com

BAE Systems is competing against Lockheed Martin to be the prime contractor for Korea's forthcoming upgrade of some 130 F-16s. Attention has focused largely on the competition between Northrop Grumman and Raytheon to supply the AESA radar. But the Korean request for proposals also invited non-OEMs to bid as system integrator.

Taiwan and the U.S. are also planning a similar upgrade to some 140 and 300 aircraft, respectively. Other F-16 operators may follow, making this a multibillion-dollar market. BAE claims long experience in supplying avionics and electronics for the F-16. It has provided head-up displays, electronic warfare systems, reconnaissance sensors, flight control computers, terrain avoidance systems, IFF transponders, Link 16 communications and other items. The company designed and has installed a new commercial fire control computer (CFCC) in 270 U.S. Air National Guard F-16C...
